

Power BI Visualisations

The screenshot shows the Power BI Desktop interface. The top ribbon includes 'File', 'Home', and 'Help'. The 'Home' ribbon has options like 'Paste', 'Copy', 'Format Comment Uncomment query', 'Find', 'Replace Command palette', and 'Copilot (preview)'. A notification bar states: 'DAX queries will be saved to your model. They won't be visible when published in the Power BI service. [Learn more.](#)'

The 'Query Editor' pane on the left shows a DAX query:

```
1 // Learn more about DAX queries at https://aka.ms/dax-queries
2
3 // Here is a sample DAX query from your model, click 'Run'
4 // Try other DAX queries by right clicking a table, column, or measure in the data pane and choosing one from 'Quick queries'
5 EVALUATE 'Data_1'
6 ORDER BY
7     'Data_1'[InvoiceDate].[Date]
8     =COUNTAX(Data_1,[Description])
9     =SUM(Data_1[UnitPrice])
10    =MAX(Data_1[TotalPrice])
11
12
```

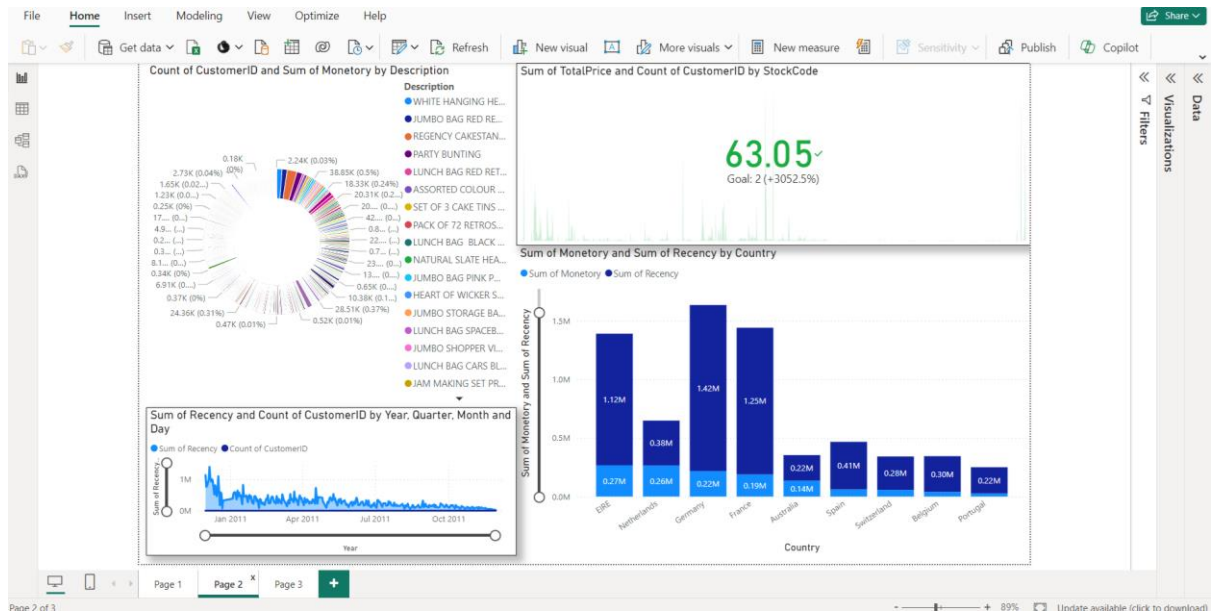

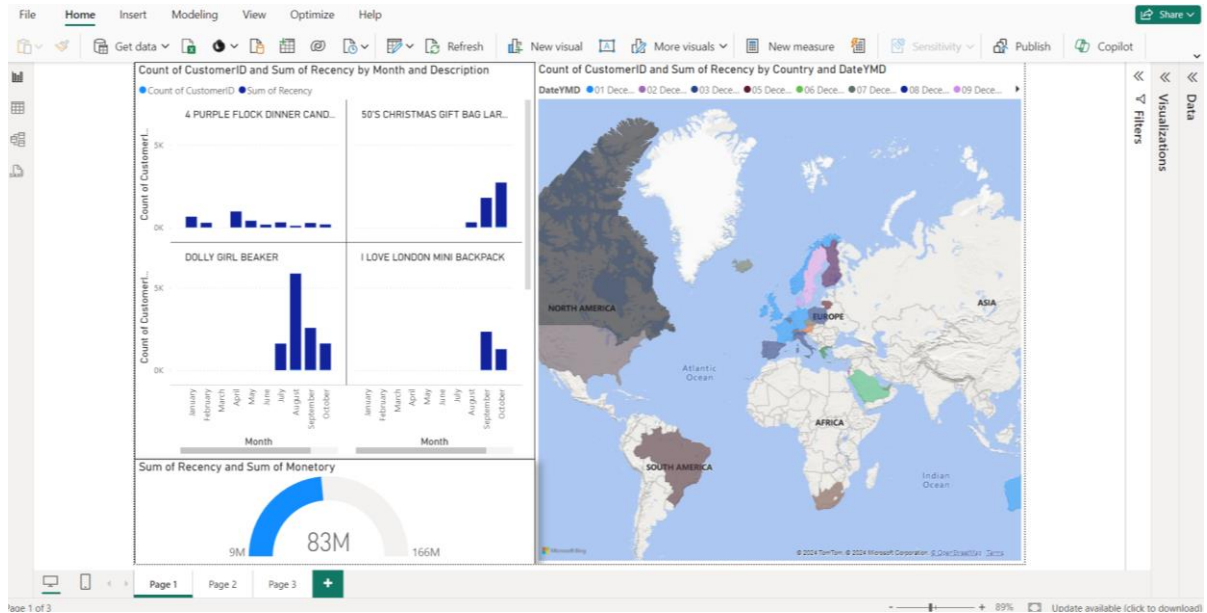

The 'Results' pane on the right shows a table with 15 columns and 66,666 rows. The columns are: Data_1[InvoiceNo], Data_1[StockCode], Data_1[Description], Data_1[Quantity], Data_1[InvoiceDate], Data_1[UnitPrice], Data_1[CustomerID], and Data_1[Country]. The status bar at the bottom indicates 'Success (4316.7 ms) Query 1 of 1 Result 1 of 1 15 columns, 66,666 rows'.
